RESEARCH AUDIOLOGIST INFORMATION SUPPORT NETWORK

RAISN's new website is LIVE! We wanted to create an online space that featured research audiology to help others connect and learn more about what it is we do & where we work. Click the links below to learn more about our group and our outreach events. Remember that we'd be happy to put together a panel of research audiologists to speak with your

student group. This is a great experience for students doing capstone projects to know more about what it's like to do research full-time. Learn more & fill out a request form [here](#). Let us know what you think!

Collaboration Corner

ASHA Special Interest Group 8:

Panel Discussion regarding Audiology with an emphasis on public health applications

SIG 8, Audiology and Public Health, invites you to join in a panel discussion centered on interdisciplinary training for the Audiologist with an emphasis on public health applications. The panelists include audiologists with (or working toward) cross training in public health, epidemiology, community health, gerontology, translational science, and global health. Their work focuses on hearing health promotion, hearing loss prevention/intervention, and the intersection of patient-based audiologic care and the social context in which individuals seek and access that care with the overall goal of improving quality of life. Come and learn why these audiologists sought degrees outside audiology and how interdisciplinary training compliments their careers in servicing the hearing health needs of populations.

Time: Feb 25, 2021 07:00 PM in [Eastern Time \(US and Canada\)](#)

RAISN Member Spotlight:

Kathryn Wiseman, AuD, PhD,

Dr. Wiseman is a post-doctoral research fellow at Boys Town National Research Hospital in the Audibility, Perception, and Cognition lab with Dr. Ryan McCreery. Her research focuses on improving clinical guidelines for children with hearing loss who use auditory technology (e.g., hearing aids, cochlear implants). She earned her clinical and research doctorates (Au.D./Ph.D.) at the University of Texas at Dallas. During her graduate studies, her work in the Children and Infant Listening Lab with Dr. Andrea Warner-Czyz centered on understanding variability in speech, language, and auditory outcomes in children with cochlear implants.

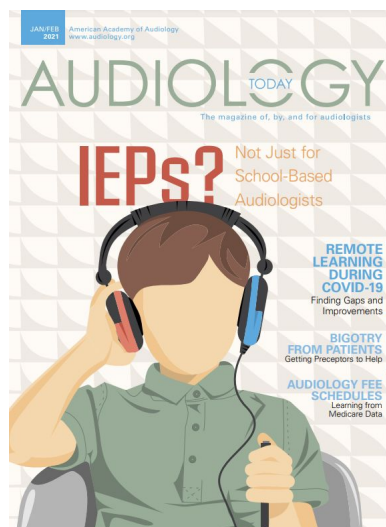

Dr. Wiseman and her colleagues recently published the article “Relationships between daily device use and early communication outcomes in young children with cochlear implants.” The authors used datalogging measurements to examine daily cochlear implant use in children under 5 years old. The results showed that children who wore their cochlear implants more hours per day had better language, speech perception, and early auditory skills compared to those who wore them fewer hours. This study also highlighted certain characteristics that put children at risk for poorer device use (e.g., presence of additional disabilities). The article can be accessed online at [Ear & Hearing](#) or by emailing [Dr. Wiseman](#).

Current Position Openings

<u>UT Southwestern, Research Audiologist</u>	Dallas, TX
<u>Eargo - Clinical Research Coordinator</u>	San Jose , CA
<u>Bose - Audiologist - Success Specialist</u>	Framingham, MA
<u>Cleveland Medical Center - Senior Research Audiologist</u>	Cleveland, OH
<u>Facebook - Research Scientist</u>	Redmond, WA
<u>Assistant Professor - Audiology</u>	Towson, MD
<u>Starkey, Manager of Clinical Research</u>	Eden Prairie, MN
<u>San Jose State University, Assistant Professor</u>	San Jose, CA
<u>California State University - Northridge, Assistant Professor</u>	Northridge, CA

Grant Funding Opportunities

<u>Hearing Health Foundation - Emerging Research Grants</u>	Deadline: February 26, 2021
<u>Cochlear Hearing & Aging Mentoring Program (CHAMPS)</u>	Deadline: March 1, 2021
<u>ASHA - Research Grants (various)</u>	Deadline: April 19, 2021
<u>ASHA - Graduate Student Scholarships</u>	Deadline: May 12, 2021

Conference Updates

Upcoming Conference Dates:

[National Hearing Conservation Association \(NCHA\):](#) February 13-14, 2021

[ARO Midwinter Meeting:](#) February 20-24, 2021

[Joint Defense Veterans Audiology Conference:](#) Deadline: March 1-3, 2021

[Early Hearing Detection and Intervention Conference:](#) March 2-5, 2021

[American Auditory Society\(AAS\):](#) March 4-6, 2021

Call for Abstracts:

[Internet & Audiology:](#) Deadline: March 1, 2021

[Phonak Sound Foundation - Call for Posters:](#) Deadline: March 15, 2021

Thank you for being a part of this community. The purpose of RAISN is to serve as a network to support and promote audiologists, scientists, and doctoral students in the field of research.
